DETAILED ACTION

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Gueret (6,176,631).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5-7, and 22-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Gueret (6,176,631).

Gueret discloses a make-up brush 1 comprising a handle 5,6 having a grip end 6 and an attachment end 5, a ferrule, and a tuft 2 of bristles 3 (col. 1, lines 9-15 and col. 4, lines 5-9). The tuft includes aligned bristles forming a generally curved elliptical shape along their width such that the tip end of the tuft is arcuately shaped and its thickness is substantially uniform (Fig. 16 and col. 3, line 65 - col. 4, line 9). The bristles are substantially the same length (Fig. 11). The width of the tuft is greater than twice the thickness of the tuft (Fig. 16). The bristles may comprise fibrous strands of synthetic nylon and/or natural hair (col. 3, lines 23-34 and 42-54). The handle is abruptly tapered, i.e., curved, at its end (see Fig. 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gueret (6,176,631).

Gueret discloses the claimed invention except for the handle or ferrule being formed from metal, plastic, wood, bamboo, etc. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the handle or ferrule from metals such as aluminum, steel, tin, tin alloys, etc., or from plastic, wood, bamboo, etc., since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Allowable Subject Matter

Claim 26 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
